

*Empower a Youth in India to Realize Their University Ambitions
& Change the Course of Their Life!*

B. Sumithra

Computer Engineering

Sumithra is currently in 12th grade and is excited at the prospect of going to university. Two of her sisters currently attend university, one of whom is only able to attend thanks to a Visions scholarship. As her father is an agricultural laborer who does not own any land, and her mother is a sweeper at the local government office, her parents simply cannot afford the university fees for another child.

Through her attendance at one of our after-school Visions Learning and Empowerment Centers, Sumithra developed strong leadership skills, enabling her to hone in on her desired future. To this end, she discovered that she loves computers. She has established basic skills in computer science and wishes to deepen her knowledge through university studies to become an engineer. She wishes to study while not burdening her parents financially.

**For just \$30/month, you can make
Sumithra's university dreams a
reality!**

Sumithra has been selected to join the next batch of Visions university scholars for 2022. Under this initiative, Sumithra is eligible for financial support to cover her university fees and related expenses, and will receive regular mentorship & counseling, leadership development training, English training, and more. Over the past 6 years, we have sponsored 75 talented youth in India through this initiative, which has enabled recipients to stay in school and manifest their dreams. And thirty (30) of these youth have already graduated and joined the workforce! Please join us by setting up a recurring contribution of just \$30/month or annual sponsorship of \$360, and we will keep you informed of your sponsored student's progress over the next year!
