

*Empower a Youth in India to Realize Their University Ambitions
& Change the Course of Their Life!*

S. Subhashini

Computer Science

Subhashini has big dreams for herself, but she questions whether she will be able to realize them due to her family situation. Her father is a day laborer but is not very involved in caring for the family. Her mother also works as a day laborer and is extremely careful in managing her earnings to take care of the needs of everyone in the home. However, she often feels sick and is not always able to work. Not working though means not earning anything, so the monthly income is unpredictable.

Subhashini loves spending time on computers and dreams of becoming an engineer. She has an older brother who graduated university with a diploma in Mechanical Engineering. As an engineer, she could find a steady job that would allow her to earn a good income, enough to support herself and her mother, especially in addressing her mother's health needs. Although her mother is not able to send her to university, to receive financial support and regular training / mentorship from Visions would mean the world to Subhashini!

For just \$30/month, you can make Subhashini's university dreams a reality!

Subhashini has been selected to join the next batch of Visions university scholars for 2022. Under this initiative, Subhashini is eligible for financial support to cover her university fees and related expenses, and will receive regular mentorship & counseling, leadership development training, English training, and more. Over the past 6 years, we have sponsored 75 talented youth in India through this initiative, which has enabled recipients to stay in school and manifest their dreams. And thirty (30) of these youth have already graduated and joined the workforce! Please join us by setting up a recurring contribution of just \$30/month or annual sponsorship of \$360, and we will keep you informed of your sponsored student's progress over the next year!
